STAT

Dear General [redacted]

STAT

I thank you very much for your letter of 3 June 1947.

An additional copy of the report "Espionage - Sabotage - Conspiracy" has been forwarded to your office.

While I am in no position to discuss officially matters of OP-29D policy, I shall be very pleased to go into the subject of coordination of captured documents and other German sources with a representative of your office and the Chief, Documents Branch. For this meeting I suggest Thursday, 12 June, or Monday, 16 June, at 2:30.

Very sincerely yours,

Peter Engelmann

Letter 23 May from
Atomic Energy Com.
to Adm. Hillenkoetter

SUBJECT: German Documents on Russian Activities in the
Field of Nuclear Physics.

1. Such German intelligence files as came into U.S. possession during and after the war, were sent to the German Military Document Section, ID, War Department. CIC will take over the exploitation of this document center on 29 June 1947, but has never received any German intelligence files or documents.

2. The small number of German documents in the above collection which relate to Soviet activities in the field of atomic energy have all been examined and exploited by the Special Document Section, ID, WDGS (at Camp Holabird). These documents were mainly general reports on Soviet scientific institutes, rather than discussions of nuclear physics. Some information was also found on the location of radio-active mineral deposits in the USSR.

3. It is believed that documents on this subject from the files of German intelligence and scientific agencies were evacuated from the European theater by
